The Melbourne Fire Station Workshop has an outdoor canopy and carport which faces East and is open to the North, East and South. It is proposed to install a metal clad wall on the North side of the large canopy between the high canopy section and the carport to provide protection from the elements to ARFFS new Internal Access Vehicle (IAV). It is also proposed to install a small wall on the North end of the small carport to provide protection from the elements for the mechanical staff vehicles.

As part of the HV Asset Replacement program of works, APAM has identified a number of HV Assets (i.e. Kiosk Substations) within the Melbourne Airport Business Park that require Vehicle Protection Barriers installed to mitigate vehicle impact damage to high risk HV Assets within the business park. Assets to have protection barriers installed were identified via risk assessment in 2014 by VicRoads Traffic consultants GTA Consultants, which was further developed to Construction Docs by GHD.

Landside : Melbourne Airport Business Park - various HV Kiosk Substation assets
